**FLIGHT NUMBERS**

**SPEED** (upper left) 1 to 14  
SPEED is the ability of a disc to cut through the air. Discs with higher numbers are faster, but require more power to achieve their true potential. Typically, a higher speed number means more upwind distance.

**GLIDE** (upper right) 1 to 6  
GLIDE measures the disc's ability to stay aloft at different speeds. Typically, more glide means more downwind distance. Newer players should look for discs with more glide. A disc rated 6 has the most glide.

**TURN** (lower left) -5 to +1  
Also referred to as High Speed Turn. TURN is the tendency of a disc to turn right (for RHBH\* throwers) early in the flight. A disc rated +1 is most resistant to turn. A disc rated -5 will turn the easiest and is more suitable for newer players.

**FADE** (lower right) 0 to 5  
All discs tail off in the same direction (left for RHBH\* shots), but some will "hook" harder than others. A disc rated 0 is the straightest finishing while a disc rated 5 will hook the most.
